JONATHAN TYNAN

Computer Science Student

jojaty@gmail.com 0431 256 756
jojaty Liquidscroll

ATTRIBUTES

Safety | Communication | Teamwork | Decision-Making | Problem-Solving | Resilience | Problem Identification | Thorough | Precise | Proactive | Adaptable

TECH SKILLS

C++ | Python | C# | SQL | HTML | CSS | Javascript | Git | Linux

Data Science & Analysis | ROS | Machine Learning | Arduino | Computer Vision | Raspberry Pi | Deep Learning | Microsoft Office Suite

EDUCATION

Computer Science Bachelor
| Deakin University

Mar 2022 - Current

- WAM: Distinction Average (78)

Tertiary Preparation Certificate
| TAFE Illawarra

Jan 2013 - Dec 2013

- Tertiary Entrance Score: 257/300

ABOUT ME

As a passionate computer science student, I am excited about the opportunity to apply my technical expertise and continue to learn and grow. With a strong foundation in programming languages such as C++, Python, and C#, as well as experience with Git and Linux, I bring a diverse skill set to the table. I have also worked on a variety of projects that demonstrate my exposure to robotics, machine learning, computer vision, and data analysis using tools such as ROS, Arduino, and Raspberry Pi and Tableau.
Throughout my career as a machine operator and in my studies as a computer science student, I have developed a keen eye for identifying hidden inefficiencies, increasing production, and delivering tangible results. I thrive in varied circumstances and excel in taking on novel projects and experiences. My strong sense of safety procedures and comfortable leadership style ensure I consistently meet and exceed targets, while my problem-solving skills and resilience allow me to overcome any obstacles that come my way.

EXPERIENCE

Powder Plant Operator | Customised Coffee Brands

Oct 2018 – Feb 2022 Unanderra, NSW

- Oversaw production of beverage powder, meeting daily targets of 1.5 tonnes and supervising temporary workers during larger runs.
- Improved machine maintenance and cleaning processes, reducing production turnaround times from 3-4 days to 1-2 days, and trained senior colleagues in machine maintenance and repair to minimize downtime.
- Managed loading and receiving procedures for 4-5 daily deliveries and analyzed coffee roasting workload to allocate resources and meet production deadlines.

Online Team Member | Coles

Dec 2014 - Dec 2017 Shellharbour, NSW

- Consistently picked and packed 15-20 accurate online customer orders per hour, managed product substitutions, coordinated team efforts, and loaded up to 500 orders across multiple delivery trucks.

Crew Member | McDonalds

Jun 2009 - Sep 2012 Warilla, NSW

- Trained in a management role, supervising production areas and coordinating anywhere between 2 to 10 people.
- Facilitated development of teamwork and comradery, resulting in being named among top McDonalds restaurants internationally.

PROJECTS

Computer-Vision Object Detection Project |

- Developed a vision-based robot that plays with cats using object detection, showing the potential of robotics and AI in pet interaction.
- Tech Used: C++ | Python | Tensorflow

Feline Feeding Habits Project |

- Developed a weight-based feeding station in order to monitor and control the feeding habits of my cats.
- Tech Used: Arduino | C++
